

SINKOLOGY[®]

CHECKLIST: QUICK-FIT[®] PRE-INSTALLATION

1. Cabinet Size Check

Current Sink Dimensions:

Before anything else, confirm your cabinet base size.

- I know my cabinet base width
- My cabinet meets one of the following:
 - 26" Quick-Fit → fits cabinet bases as small as 29" (30" preferred)
 - 34" Quick-Fit → requires a 36" cabinet base

Sinkologist[®] Tip: Measure inside edge to inside edge of your cabinet for the most accurate sizing.

2. Existing Sink Removal

Make sure you can safely remove your current sink.

- I can access plumbing under the sink
- I am comfortable disconnecting water lines and drain pipes
- My current sink can be removed without damaging countertops

Sinkologist Tip: If your sink is heavily sealed or undermounted, removal may take a little extra time.

3. Countertop Compatibility

Good news here. Quick-Fit is designed to work with what you already have.

- My countertop is in good condition
- I do NOT need to remove or replace my countertop
- My existing cutout is compatible or can be slightly adjusted if needed

Quick-Fit installs from above, not below. That is what makes the difference.

SINKOLOGY®

4. Cabinet Front Adjustment

Quick-Fit requires a small opening for the apron front.

- I understand a small cut will be made to the front of my cabinet
 - I am comfortable making a basic, measured cut
- OR
- I have someone who can help with this step

This is a targeted adjustment, not a full cabinet rebuild.

5. Tools You'll Need

No specialty tools required. Just the basics.

- Tape measure
- Drill or screw driver
- Saw (for cabinet front cut)
- Level
- Silicone sealant

6. Installation Support

You are not on your own.

- I can access the BILT® App for step-by-step instructions. Download the BILT App and search "Sinkology" to find installation instructions specific to the Quick-Fit Drop-In Sink.
- I am comfortable following guided installation steps with visuals and audio
- I know Sinkology support is available if I need help via email: customer.service@sinkology.com or phone [866.915.3003](tel:866.915.3003)

Sinkologist Tip: The BILT® App walks you through the process with voice, text, and interactive visuals.

SINKOLOGY®

7. Final Confidence Check

Before you start, ask yourself:

- I want a farmhouse look without a full remodel
- I prefer a faster, DIY-friendly installation
- I am ready to upgrade my kitchen without major disruption

If you checked most of these boxes, you are ready for Quick-Fit.
